

Horseshoe Lake Newsletter
May 28, 2021

Hello,

I received an email from Dale Dressel, Northern Aquatics that indicates treatment of Horseshoe Lake for EWM will likely occur next week on Tuesday. Dale has notified the DNR of his planned treatment. There are other lakes in the area that he will be treating too. I will let you know when our lake is actually treated. Please stay out of the water on Tuesday and do not use the lake for irrigation next week. I will try to keep you updated.

Ed Wink
