Dear Lake Shore Property Owner,

The intent of this letter is to notify you that the Horseshoe Lake Property Owners Association has hired Northern Aquatic Services (NAS), an herbicide application company, to chemically treat nuisance aquatic vegetation including Eurasian watermilfoil in some areas of Horseshoe Lake. A WI DNR permit application has been submitted to treat roughly 1.44 acres near the narrows between the two basins. The herbicide to be used is ProcellaCOR, a very fast and effective herbicide that has been used before on Horseshoe Lake with great results. It is labeled for aquatic use by the Environmental Protection Agency. Once the herbicide has been applied, any water usage restrictions in the area will be posted on yellow signs attached somewhere on the adjacent properties.

You may view a copy of the application at the following websites https://leapsllc.com/index.php/horseshoe-lake-property-association/ or https://www.horseshoelake.org/. The planned treatment is in accordance with the new Horseshoe Lake Aquatic Plant Management Plan (APM Plan) approved by the WDNR on March 3, 2022. Questions concerning the APM Plan can be explored on the webpage or be directed to Edward Wink of the Lake Association at ewink@umn.edu. NAS will complete the chemical treatment sometime between May 15th and June 15th 2022

If you have any questions you may contact Dale Dressel of Northern Aquatic Services, Dave Blumer at Lake Education and Planning Services, or Tyler Mesalk – WI DNR Aquatic Plant Management Specialist at 715-416-5066. Chemical fact sheets and or herbicide labels are available upon request.

Sincerely,

Dave Blumer
